TLA 2 Student Gradebook with JSON

Nasser Hilla • Sep 7

20/20

Due Sep 10, 11:59 PM

Instructions:

-
- Create a Python program that allows the user to input at least 3 students' names and grades.
- Store the data into a JSON file.
- When the program runs again, it should read the JSON file and display all saved records.

Knowledge Sources

Nasser Hilla • Jul 31 (Edited Aug 13)

5/5

Due Jul 31

Before our session on Knowledge Sources and Elicitation, consider a complex decision you've recently made (e.g., choosing a university, buying a gadget, planning a trip).

Identify at least three different types of knowledge sources you utilized (or could have utilized) to inform that decision. For each source, briefly explain how it contributed to your understanding or decision-making process.
