Activity 3: Anomaly Detection:

2. Tasks

a. Manual Identification

- Look at the dataset. Which values seem to be *anomalies*? Why?
The letter E category is the anomaly I see

b. Visualization (Optional if using Excel/Colab)

- Plot a simple **boxplot** or **scatterplot** of the scores.
85,90, 88, 92, 12, 87, 89, 91, 250, 86
- Highlight the unusual values.
Letter E is unusual because its zero

c. Anomaly Detection with Python (for those using Colab)

- Use the provided Colab code to run anomaly detection with **Isolation Forest**.
Id used google colab for this
- Identify which students are flagged as anomalies.
Letter E

d. Discussion Questions

- Which students were identified as anomalies?
The Letter E
- What could be the possible reasons behind these anomalies (e.g., data entry error, exceptional performance, illness)?
Because the score is 12 unlike the others the score is normal
- If this dataset represented **financial transactions** instead of scores, how would anomaly detection help prevent fraud?
I don't know maybe the system itself will have a warning notification telling it is fraud
- Why is it important to check anomalies in *healthcare, business, or cybersecurity*?
To know if it is safe or not and its legitable for healthcare, business

Praised be Jesus and Mary!

To prepare for our upcoming lessons and ensure a smooth development experience, please complete the following installations before our next class:

✦ Instructions to Download Orange Data Mining App

- Open your web browser.
- Go to the official Orange website:

👉 <https://orangedatamining.com/download>

Select your operating system:

- Click on Windows, macOS, or Linux, depending on what device you are using.
- Click the download button to start downloading the installer.
- Once downloaded, locate the file in your Downloads folder.
- Double-click the installer file and follow the installation steps on the screen.
- After installation, open the Orange application to start using it.

NOTE: Make sure everything is installed and working properly. If you encounter any issues, feel free to reach out or bring your questions to class.

👉 COMMENT DOWN IF YOU HAVE SUCCESSFULLY DOWNLOADED THE SOFTWARE! Your comment will be considered as your attendance for today.

Thank you and God bless!

Praised be Jesus and Mary!

Please check in by answering the question below in the comment section.

Check-in Question:

What is your take away from the video posted today? (Minimum: 2-3 sentences)

Reminders:

Dropping your comments will serve as your attendance and engagement for today's asynchronous session.

Deadline is today before 5:00 PM

Thank you!
